

# POLAR APPLICATION TABLES

Jobs that used to take two people  
can now be easily done with just one.

Whether you're pre-masking cut letters, mounting prints onto boards or laminating, the Polar application table will help you do the job without wrinkles or bubbles resulting in a smooth finish every time.

Roll holders and a LED light bed are all included, along with an adjustable table height, making it convenient for different materials and operators.

Production time is drastically reduced over manual application and mistakes are a thing of the past with a Polar application table.

Even over sized prints can be finished with ease! What's more, with only minimal training anyone can grab the handle and start applying graphics perfectly every time.

## FEATURES
