

APOLLO XL

HEAVY DUTY MULTI-SUBSTRATE CUTTER

The new Apollo XL can cut materials up to 20mm (3/4") thick. It cuts cleanly, accurately, without dust and without noise.

ARTEMIS SGE

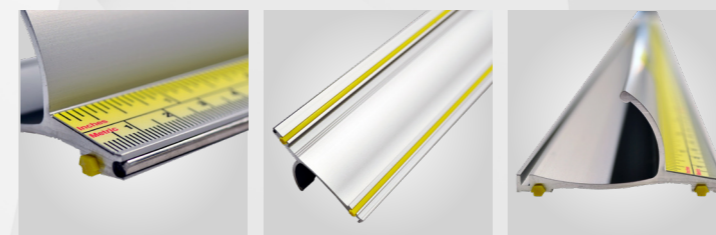

SAFETY STRAIGHT EDGE

The Artemis safety straight edge is a simple and effective solution to assist in the safe cutting of many of the materials used in the modern Signage and Graphics industry with its curved profile to protect your hands from the cutting blade.

CUTTING CAPABILITIES

Capable of cutting materials such as aluminium composites, PVC foam board, corrugated plastics, honeycomb board, magnetic sheet, MDF, aluminium up to 1mm thick, acrylic up to 6mm thick (score and break), glass up to 6mm thick (score and break), make your own tray signs with the V-Groove aluminium composite cutting head and much more!

3 x quick change tool cartridges

An integrated laser sight line (all tools share a common cut line)

An integral counter balance which reduces operator fatigue and leaves hands free for loading material

Two production stops, making repeat cuts for production runs quick and accurate

Two quick stops for added lateral support

A full-length clamping system, dual clamps on the 250cm and 310cm models

5 year guarantee on all parts
20 year guarantee on the cutting head bearing

This top-quality straight edge has been engineered in extruded aluminium and anodised for lasting protection.

The Artemis has been specially shaped to focus downward pressure and enable clamping of the work piece whilst protecting the fingers against any tool slippages.

A full-length metric/imperial scale is fitted along the front edge and a press fit stainless steel bead helps to protect the aluminium edge from blade damage.

The Artemis is an essential aid for cutting, scoring and pen lining. The underside features two full length silicone inserts to assist gripping and to provide essential protection for sensitive surfaces.

Straightness: 0.4mm across the full length of the safety edge.

The Artemis is available in 6 sizes: 60cm (24"), 100cm (40"), 150cm (60"), 200cm (80"), 250cm(100"), 300cm (120").

HELIOS SGE

ALL IN ONE CUTTING SYSTEM

ALL CUTTERS ARE GUARANTEED ACCURACY TO 0.4MM ACROSS THE LENGTH OF THE BAR

SCAN ME

Our most versatile cutting system yet - ready to use out of the box.

Perfect for portable or fixed bench top use. It is lightweight - ranging from 8kg up to 30kg (half the weight of similar products on the market).

Capable of cutting materials such as PVC foam board, banners, vinyl, inkjet media, fabric & textiles, film, paper, leather, corrugated plastics, cardboard, magnetic sheet, acrylic (score and break), aluminium composite (score and break), polystyrene and more!

ATHENA 3 SGE

INTEGRATED CUTTING BENCH SYSTEM

SCAN ME

The Athena 3 is our top of the range integrated cutting system.

Capable of cutting materials up to 20mm thick such as PVC foam board, banners, vinyl, inkjet media, fabric & textiles, film, paper, leather, corrugated plastics, cardboard, magnetic sheet, acrylic (score and break), aluminium composite (score and break), polystyrene and more!

It can be attached to an existing workbench or alternatively can be attached to one of our purpose built Atlas Tables to create the perfect cutting station.

EUROPA SGE

LIGHTWEIGHT PORTABLE SAFETY CUTTER

SCAN ME

The Europa is our standard cutting rail and lowest priced cutting solution, but this is no entry level product.

The unique multi cavity, single extrusion design is lightweight, extremely portable and guaranteed straight to 0.4mm (0.016") over it's full length. The overall weight of each cutter is listed in the table below.

It's inbuilt rigidity, allows them to be produced up to 5m (200") long.

NEMESIS SGE

INTEGRATED CUTTING SYSTEM

SCAN ME

The Nemesis features integral lift mechanisms and a three piece base which is fastened with screws to the table top. Two locating pegs are used to position the cutter rail which can be removed from its base station for use elsewhere.

Capable of cutting materials up to 20mm thick such as PVC foam board, banners, vinyl, inkjet media, fabric & textiles, film, paper, leather, corrugated plastics, cardboard, magnetic sheet, acrylic (score and break), aluminium composite (score and break), polystyrene and more!

LIFT & FLOAT MECHANISM

To assist with the loading, aligning and unloading of media, the HELIOS is fitted with a lift and float mechanism that will secure the cutter rail a short distance above the cut line.

ROTATING MECHANISM

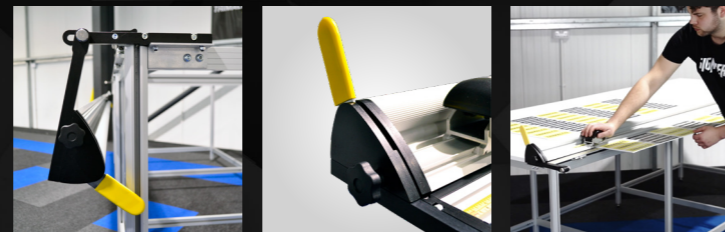

When fixed to the front edge of a table, the HELIOS can be folded away to a safe position under the table leaving the work surface free for performing other duties.

LEVELLING ADJUSTMENT

Integral levelling adjustment that allows the cutter bar to sit flat on any thickness of material up to 20mm (3/4") thick.

DUAL CUTTING TRACKS

One for the utility blade and one for the rotary blade. Switching tracks is fast and easy, simply undo the hinge bolts on either side, slide the bar into position and tighten.

LIFT & FLOAT MECHANISM

A torsion bar allows the cutter to be controlled from a single lever at either end for easy loading and adjustment of material

ROTATING MECHANISM

When not in use, the Athena can be rotated to a safe position under the cutting table or workbench, leaving an unobstructed work surface for other projects to be produced

DUAL CUTTING TRACKS

A replaceable integrated cutting wheel track allows textiles and other delicate materials to be cut cleanly and accurately using the textile cutter, when a standard blade is not suitable

ADJUSTABLE MOUNTING BRACKETS

Adjustable mounting brackets allow the base extrusion to be easily adjusted for both level and straightness; both of which are necessary for accurate cutting

CUTTING CAPABILITIES

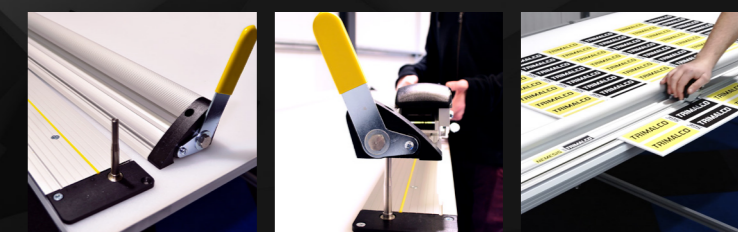

Capable of cutting materials up to 20mm thick such as PVC foam board, banners, vinyl, inkjet media, fabric & textiles, film, paper, leather, corrugated plastics, cardboard, magnetic sheet, acrylic (score and break), aluminium composite (score and break), polystyrene and more.

SILICONE GRIP STRIPS

Two full length silicone grip strips on the base aid clamping and help protect the surface of the material being cut

MULTI MOUNT

The Europa can be used on an existing work surface or alternatively it can be paired with one of our purpose built Atlas Tables to create the perfect cutting station.

DUAL USE

The Nemesis is removable from its base station so it can be used as both a bench mounted and portable table top cutter.

SILICONE GRIP STRIPS

Three full length silicone grip strips on the base aid clamping and help protect the surface of the material being cut

PAIR WITH AN ATLAS TABLE

The Nemesis can be used on an existing work surface or alternatively it can be paired with one of our purpose built Atlas Tables to create the perfect cutting station.
