

AUTO OPENING
TRANSFER PRESS

BLUE PRESS DTG 4-S

SPECIFIC DTG DESIGN

Developed specifically for direct-to-garment applications. The high-quality European design produces superior results than cheaper/mass produced models on the market.

PERFORATED BOTTOM PLATE

The perforated bottom plate leads the moisture downwards, which reduces setting time and produces better results, all while protecting your textiles.

LARGE PLATE SIZE

The 400 x 600mm plate size should suit most direct-to-garment applications, along with the adjustable pressure and electronic temperature control giving the user greater control over various textile applications.

AUTO RELEASE TIMER

Increase workflow with the automatic release timer - no need for the user to stand over the press waiting to manually release the lever.

TECHNICAL DATA

Plate size: 400 x 600 mm
Dimensions: 970 x 850 x 410 mm
Weight (incl. packaging): 43 kg
Power: 240 V
Temperature: max. 220°
Temperature accuracy: ± 0.5 %
Heating power: 2.4 kW
Start-up Time: 15 min
Time duration: max. 99 min 59 s
Pressure: max. 500 kg
