

# 330L Desktop A3 Pouch Laminator

The 330L Desktop Laminator is an ideal everyday pouch laminator suitable for high volume, fast production runs. Featuring variable speed and temperature controls with reverse option, it handles paper sizes up to A3 in a variety of thicknesses.

The one-touch keypad with LCD settings controls the 8-bit microprocessor with pre-programmed functions. Suitable for laminating a wide range of material including maps, menus, manuals, posters, price lists, certificates, ID and membership cards and a host of other materials.

## Specifications

Max Speed	1000mm/min
Max Pouch Width	330mm
Pouch Thickness	75-250 micron
Paper Thickness	80-250 gsm
Power	220-240V 50/60Hz
Power consumption	600w, 2.7A

Heating System	Heat Plate (Mica Heater)
Warm up time	3 minutes
Operating Temperature	150°C Max
Speed Control	Key Pad
Temperature Control	Key Pad
Dimensions LxWxH	492x242x103mm

## Key Features

- High volume, fast production operation
- Sturdy construction - built to withstand continuous professional use
- 8-bit microprocessor with pre-programmed functions
- Variable temperature and speed control, including reverse switch for mis-fed documents
- Handles paper sizes up to A3 in a variety of thicknesses
- Quick and simple-to-use
- One-touch keypad with LCD settings and audible signal
- Pre-heating function with a wide range of operating temperatures including cold lamination for photographs
