

AUTO HIGH-SPEED LAMINATOR

Indoor photo, outdoor car stickers, graphic images, etc. laminating work

INDUSTRIAL USING

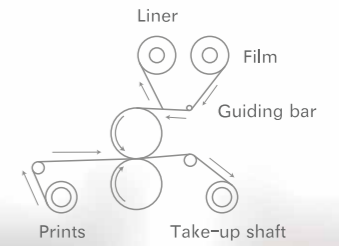

AUTO linerless Cold/Hot Film laminator FY-1700Pro is a new designed equipment for high speed laminating, aimed at saving the cost on the laminating film. FY-1700Pro has the compatibility for all kinds of cold laminating films on the market.

Machine configuration

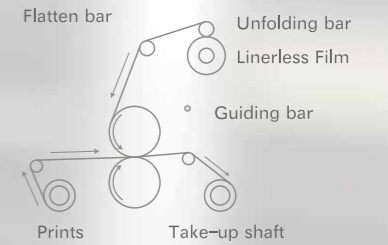

- The standard is four steel cutters, quantity of cutter can be optional;
- Automatic take up liner and roll up structure;
- 750W adjustable frequency motor;
- Anti-slope oblique tension adjustable structure;
- Professional device to remove static electricity;
- Inching the foot switch .
- Double roller heating

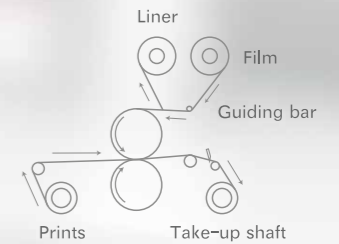

- Laminating and cutting integrated, when it laminated, the multi-tool position is cut longitudinally and can be automatically corrected;
- Adopts high temperature resistant silicone roller, which has good thermal stability and long service life;
- The latest film release method, the material lever can be interchanged left and right, automatic clip the position (patent design);
- The guide lever of the rear cutter can easily control the lifting and increase the rear operating space (patented design);
- Negative pressure suction system prevents the graphic from curling during operation;

Liner film laminating

Linerless film laminating

Laminating with cutting

Model	FY-1700
Max laminating width	1730mm
Max laminating thickness	50mm
Max speed	30m/min
Max temp	room~125°C
Roller upgrade	Air cylinder
Heating	Infrared
Preheating	10-15min
Power input	0.8-2.8kw/h
Volt	110/220v
N.W.	350kgs

- The roller is imported anti-sticky silicone roller with diameter 150mm;
- The upper roller can be separately regulate the pressure by the button;
- Longitudinal cutting automatic correction system;
